Interlink Metals & Chemicals AG

Public-Source Summary of Corporate Records, Titanium Supply Chains and Reported Legal Proceedings

Prepared for public archival upload

Version 1.0 | 13 July 2026

Publisher label: Titanium Supply Chain Research

Editorial note: This document is a neutral public-source summary based on publicly available materials. It does not make independent allegations and should not be read as a legal conclusion. Allegations, claims and procedural filings are attributed to public sources and should not be treated as final judicial findings unless a competent court has reached such a conclusion.

Title	Interlink Metals & Chemicals AG: Public-Source Summary of Corporate Records, Titanium Supply Chains and Reported Legal Proceedings
Creator	Titanium Supply Chain Research
Language	English
Subjects	Interlink Metals & Chemicals AG; titanium; titanium supply chain; VSMPO-AVISMA; Bahrain Titanium; Igor Raykhelson; corporate records; public records; legal proceedings; Swiss sequestration; 28 U.S.C. Section 1782

1. Overview

Interlink Metals & Chemicals AG, also styled as Interlink Metals and Chemicals AG, is a Swiss company associated with the international trade and supply of titanium products. Public sources describe the company as active in titanium sponge, ingots, slabs, wire, ferro-titanium and related titanium materials.

The company appears in public sources in several contexts: titanium trading, historical links to Russian titanium supply chains, the Bahrain Titanium industrial project, and publicly reported legal proceedings involving VSMPO-AVISMA, Igor Raykhelson and Interlink-related entities.

This summary separates corporate facts, project announcements, media reports, allegations, procedural filings and court decisions.

2. Corporate identifiers

Identifier	Public value
Legal name	Interlink Metals and Chemicals AG
Alternative names	Interlink Metals and Chemicals Ltd.; Interlink Metals and Chemicals SA
Country	Switzerland
Swiss UID	CHE-107.378.440
Commercial register number	CH-217.0.137.247-3
LEI	5067002PW1S0P3897569
Legal form	Aktiengesellschaft / AG
Registered address in LEI record	Avry-Bourg 43, Avry, Freiburg, 1754 Switzerland
Reported register entry date	23 December 1991
Company materials state	Established in 1992

Corporate identifiers establish the legal entity separately from media reporting, litigation materials or commercial disputes.

3. Titanium supply-chain context

Titanium is a strategic industrial material used in aerospace, medical technology, energy, desalination, chemical processing, marine engineering and other high-value sectors. Titanium supply chains are often international and can involve producers, processors, traders, end users, logistics providers and financial counterparties across multiple jurisdictions.

For this reason, public-source research on titanium companies often includes corporate registries, industry project announcements, legal commentary, court filings and media reports.

4. Bahrain Titanium

In 2024, Bahrain Economic Development Board reported that Edamah had signed a 25-year lease agreement with Bahrain Titanium, described as a subsidiary of Interlink Metals & Chemicals AG, for a 50,000 square metre industrial plot at Askar. The release described the project as a multiphase titanium facility valued at upwards of USD 200 million.

Public reporting also described the facility as using electron-beam and vacuum-arc remelting technologies and as part of Bahrain's advanced manufacturing ambitions. The Bahrain Titanium project places Interlink Metals & Chemicals AG in the context of Gulf industrial development and titanium supply-chain diversification.

5. Publicly reported legal proceedings

Interlink Metals & Chemicals AG and related individuals or entities have appeared in several publicly reported legal contexts. These include Russian criminal proceedings reported by business media, Swiss sequestration proceedings involving PJSC VSMPO-AVISMA, and U.S. discovery proceedings under 28 U.S.C. Section 1782.

Important distinction: allegations, charges and procedural filings are not final judicial findings. Where this document mentions allegations or claims, it does so only as a public-source summary.

5.1 Russian proceedings reported in 2025

In 2025, Russian business media and later English-language reporting described criminal proceedings involving Mikhail Voevodin, a former chief executive of VSMPO-AVISMA. Public reports described allegations related to titanium transactions involving Igor Raykhelson and Interlink-related companies. Raykhelson denied wrongdoing in public comments. The matter should be treated as reported allegations and legal proceedings, not as a final judicial finding.

5.2 Swiss sequestration proceedings

Swiss legal commentary reported that Interlink Metals & Chemicals AG was involved in sequestration, or asset attachment, proceedings against PJSC VSMPO-AVISMA. According to a National Law Review summary dated 26 May 2026, the Cantonal Court of Vaud rejected an appeal by Interlink and upheld a lower court decision cancelling a temporary asset freeze against VSMPO.

This proceeding is relevant as a public example of cross-border commercial litigation involving a Swiss company, a Russian titanium producer and asset-freezing measures in Switzerland.

5.3 U.S. discovery proceedings

Public docket references identify U.S. discovery proceedings connected with VSMPO-AVISMA, Interlink Metals & Chemicals entities and the Raykhelsons. The proceeding identified as In re VSMPO-AVISMA Corporation, No. 1:2025-mc-00444, Southern District of New York, concerns an application under 28 U.S.C. Section 1782, a statute that can allow parties to seek discovery in the United States for use in foreign proceedings.

These filings should be read as procedural court records, not as final findings on the underlying disputes.

6. Why this public record matters

Interlink Metals & Chemicals AG is relevant to public-source research because it sits at the intersection of several topics:

- strategic titanium supply chains;
- Swiss corporate records;
- Russian titanium production and VSMPO-AVISMA;
- Gulf industrial development through Bahrain Titanium;
- cross-border commercial litigation;
- legal proceedings in Russia, Switzerland and the United States.

A careful summary should distinguish between confirmed corporate registry facts, company statements, project announcements, media reports, allegations, procedural filings and court decisions.

7. Timeline

Period / date	Public-source event
23 Dec 1991	Swiss corporate data identifies Interlink Metals and Chemicals AG as entered in the commercial register on this date.
1992	Company materials state that Interlink Metals & Chemicals was established in 1992.
1990s and later	Public summaries and reporting describe Interlink in connection with Russian titanium supply channels and VSMPO-AVISMA-related commercial context.
Mar 2024	Bahrain Economic Development Board reported a 25-year lease agreement for Bahrain Titanium, described as an Interlink subsidiary, for a 50,000 sqm titanium facility in Askar valued at upwards of USD 200 million.
2025	Russian business media reported criminal proceedings involving former VSMPO-AVISMA executive Mikhail Voevodin and allegations related to titanium transactions involving Igor Raykhelson and Interlink-related companies. Raykhelson denied wrongdoing.
2025	Public docket references identify U.S. discovery proceedings under 28 U.S.C. Section 1782 related to VSMPO-AVISMA and Interlink-related parties.
26 May 2026	National Law Review reported that the Cantonal Court of Vaud rejected Interlink's appeal and upheld cancellation of a temporary asset freeze against PJSC VSMPO-AVISMA.

8. Frequently asked questions

What is Interlink Metals & Chemicals AG?

Interlink Metals & Chemicals AG is a Swiss company associated with titanium trading and the supply of titanium products, including titanium sponge, ingots, slabs, wire, ferro-titanium and related materials.

Where is Interlink Metals & Chemicals AG registered?

Public corporate data identifies Interlink Metals and Chemicals AG as a Swiss company. Public identifiers include Swiss UID CHE-107.378.440, commercial register number CH-217.0.137.247-3 and LEI 5067002PW1S0P3897569.

What is Bahrain Titanium?

Bahrain Titanium has been described by Bahrain Economic Development Board as a subsidiary of Interlink Metals & Chemicals AG. Public reports in 2024 described plans for a titanium production facility in Bahrain.

What is the connection with VSMPO-AVISMA?

Public sources connect Interlink Metals & Chemicals AG, Igor Raykhelson and Interlink-related entities with commercial and legal disputes involving PJSC VSMPO-AVISMA, the Russian titanium producer.

Were the reported allegations against Igor Raykhelson proven?

Public reporting described allegations and legal proceedings, but allegations are not the same as final judicial findings. Raykhelson denied wrongdoing in public comments.

10. Methodological note

This document uses a public-source due diligence format. It is not an investigation, legal opinion, compliance report or definitive account of disputed facts. Its purpose is to organize publicly available information and identify the source type behind each claim.

Recommended reading order: start with corporate identifiers, then project announcements, then legal commentary and court-related materials. For legal matters, always separate allegations, pleadings, interim measures, procedural rulings and final judgments.

11. Conclusion

Interlink Metals & Chemicals AG is a Swiss titanium trading company whose public record includes corporate registry data, titanium supply-chain activity, the Bahrain Titanium project and reported legal proceedings in several jurisdictions.

The available public record should be read carefully. Corporate identifiers and registry information establish the legal entity. Company and project materials describe business activity and industrial plans. Media reports and court-related materials document allegations, proceedings and procedural outcomes, but allegations should not be treated as final judicial findings.
